## EDUCATION

---

**BSc in Computer Science** 2014-2018  
*University of the Chinese Academy of Sciences, Beijing China*

**Visiting Student** 2017-2018  
*Oxford University, St. Edmund Hall, UK*

**PhD in Computer Science** 2018-present  
*King's College London, UK*  
won a full scholarship from the Chinese Scholarship Council and King's College London

## PROJECTS

---

**A fast regular expression matching algorithm using derivatives** 2018-present  
*King's College London*  
Improved the derivative algorithm for regular expressions by Brzozowski, Sulzmann & Lu.  
The improvement drastically reduces the size of derivatives.

**A short survey on graph isomorphic problems** 2016 Summer  
*Institute of Software, the Chinese Academy of Sciences*  
Worked out a solution for a linear time algorithm for checking if two graphs have matching degree sequences.

**A data mining program for the transportation system of the Guangdong Province** 2017-2018  
*University of the Chinese Academy of Sciences*  
Developed a program for stream data mining; explored mining techniques for large data transportation systems.

**A simplified version of the TCP protocol** <http://github.com/hellotommy/cTCP>  
Uses the NewReno algorithm for congestion control.

**A simple database system** <http://github.com/hellotommy/db>  
Proof-of-concept implementation of database system supporting SQL queries.

## VOLUNTEER AND EXTRACURRICULAR ACTIVITIES

---

**Piano Accompanist** 2014-2015  
*for the PhD-student choir, University of the Chinese Academy of Sciences*  
Accompanied the choir in 10 concerts.

**Voluntary Piano Teacher** 2015-2016  
*at the student music club, University of the Chinese Academy of Sciences*  
Taught 4 students over 2 semesters.

**Open Swimming Tournaments** 2015-2018  
*University of the Chinese Academy of Sciences*  
Participated in 3 open tournaments in the Water Cube in Beijing.
